

ESOF AppSec ADA CASA User Guide

Cloud Application Security Assessment (CASA) | Powered by TAC Security

Step 1: Visit the CASA Platform

- Open the CASA portal: <https://casa.tacsecurity.com/>
- Review the available subscription plans.
- Select the plan that best fits your organization.

Available Plans:

- ESOF AppSec ADA CASA – Basic AL1
- ESOF AppSec ADA CASA – Enterprise AL1
- ESOF AppSec ADA CASA – Premium AL1
- ESOF AppSec ADA CASA – Enterprise AL2
- SOC 2 Add-on (Optional)

Step 2: Complete Payment

Fill in the required billing and payment information.

Required Details

- Full Name
- Business Email Address
- Billing Address
- Company Name
- Payment Details (Card Number, Expiry Date, CVV)
- Referral/Coupon Code (Optional)

Checkout

For any query please contact us at google@atacsecurity.com

Note: Apply the coupon code before clicking Pay.

Outcome:

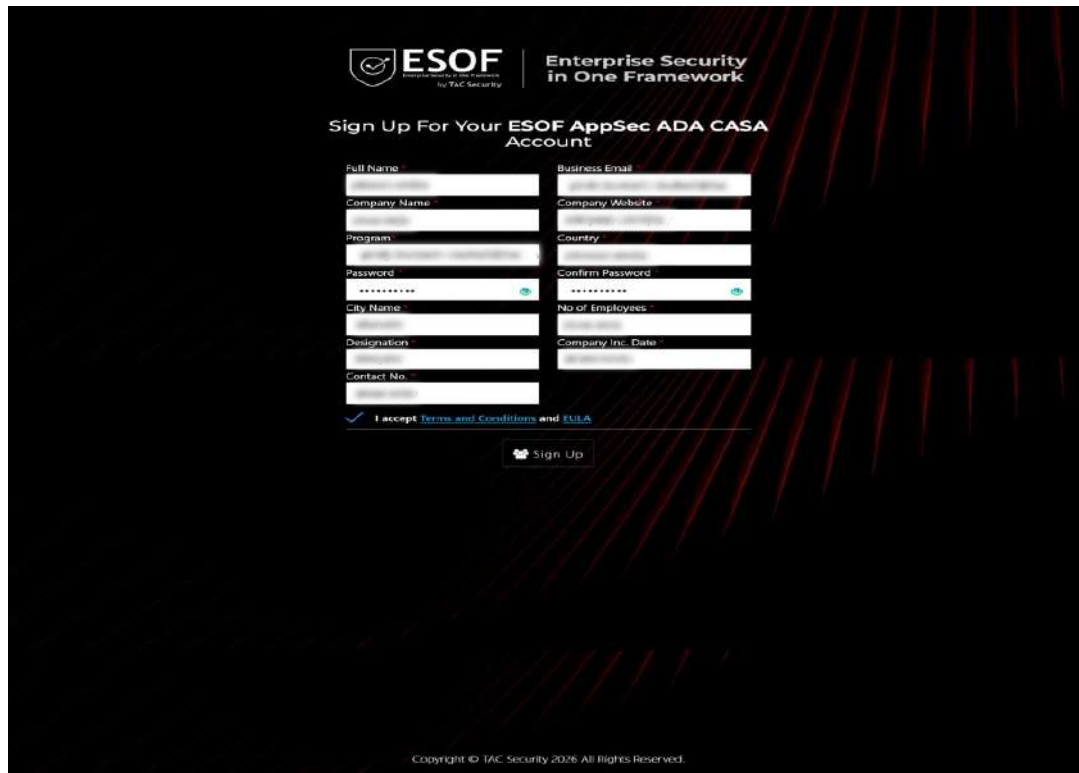

- A payment confirmation email will be sent to your registered email address.

Step 3: Create Your CASA Account

Complete the registration form by providing the following information:

- Full Name
- Business Email Address
- Company Name
- Company Website
- Program
- Country
- City
- Number of Employees
- Designation

- Company Incorporation Date
- Contact Number
- Password
- Confirm Password

The screenshot shows a registration form for ESO AppSec ADA CASA. The form is titled "Sign Up For Your ESO AppSec ADA CASA Account" and is set against a dark background with a red wavy pattern. The ESO logo and tagline "Enterprise Security in One Framework" are at the top. The form fields are arranged in two columns: Full Name, Business Email, Company Name, Company Website, Program, Country, Password, Confirm Password, City Name, No of Employees, Designation, and Company Inc. Date. A checkbox for "I accept Terms and Conditions and EULA" is at the bottom left, and a "Sign Up" button is at the bottom right. A copyright notice "Copyright © TAC Security 2026 All Rights Reserved." is at the very bottom.

Field	Field
Full Name	Business Email
Company Name	Company Website
Program	Country
Password	Confirm Password
City Name	No of Employees
Designation	Company Inc. Date
Contact No.	

☒ I accept Terms and Conditions and EULA

Sign Up

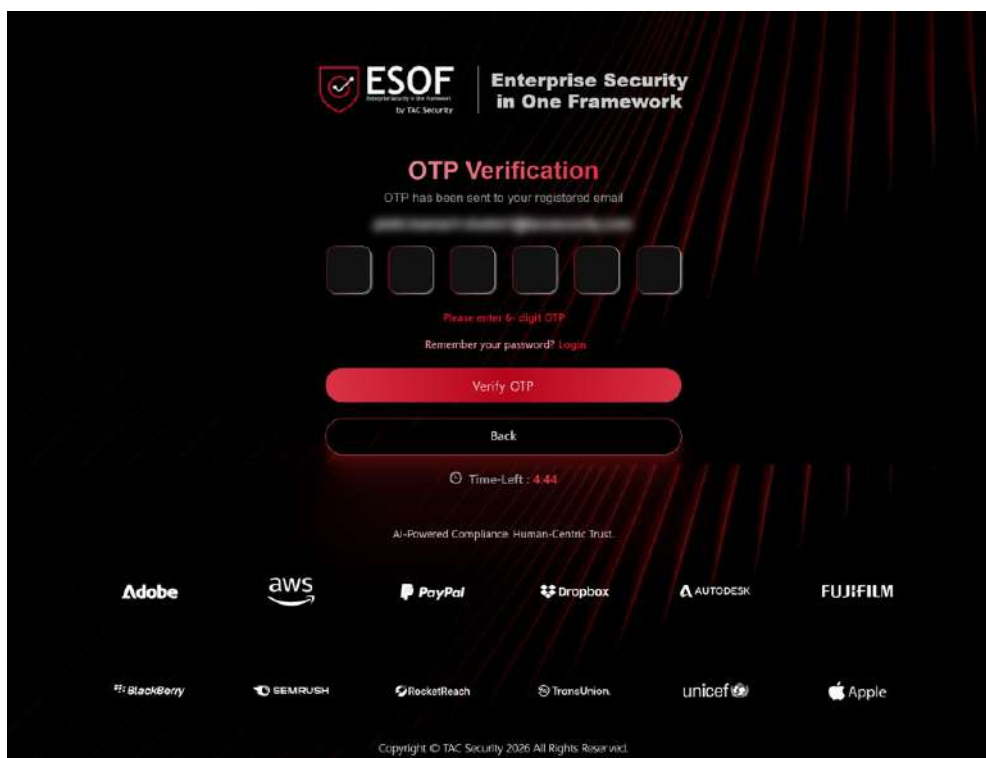

Copyright © TAC Security 2026 All Rights Reserved.

Outcome:

After successful registration, you will be redirected to the Login page.

Step 4: Login & Verify Your Account

- Login using your registered email address and password.
- An OTP (One-Time Password) will be sent to your registered email.
- Enter the OTP to verify your identity.

**Outcome:**

After successful verification, you will be redirected to your CASA Dashboard.

Step 5: Complete LOV Details

After logging in:

- Navigate to the LOV (Letter of Validation) section.
- Complete all mandatory LOV fields.
- Submit the LOV information.

LoV Required Details

For Asset 1

Email ^{*} Assurance Level ^{*}

GCP Project Number ^{*} Company Name ^{*}

Home Page URL ^{*} Application Name ^{*}

Application URL ^{*} Google Program Name ^{*}

Application Type ^{*} Screenshot of Email from Google ^{*}

Choose File No file chosen

Choose File No file chosen

Submit

Outcome:

- Full access to the CASA platform is unlocked.
- You can now begin creating security scans.

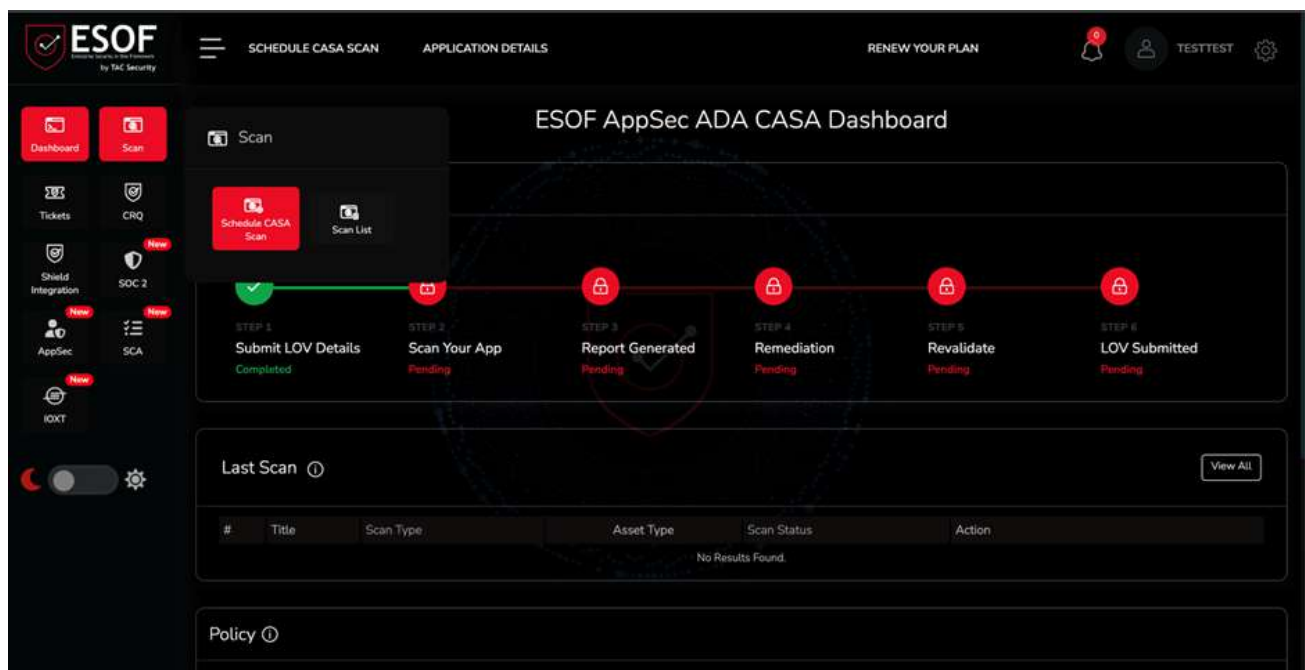

Step 6: Configure & Run Security Scans

Navigate to Scans from the dashboard.

Create a New Scan

Provide the following details:

- Application Name
- Target URL
- Environment
- Scan Frequency
- Scan Type (Web or API)
- Run the scan immediately
- Submit the scan request.

The screenshot shows the 'Schedule CASA Scan' form in the ESO AppSec ADA CASA dashboard. The form includes fields for Title (TestApp), Project ID (PD_1105_1785580249), Scan Source (URL), Source URL (https://app.testapp.com), Choose Asset Type (Web, Android, iOS, API, Audit On, Extension), GCP No. (03030030300330), and Version (version002). There is a large text area for a comment and a checkbox for Authentication Details. A 'Submit' button is at the bottom right.

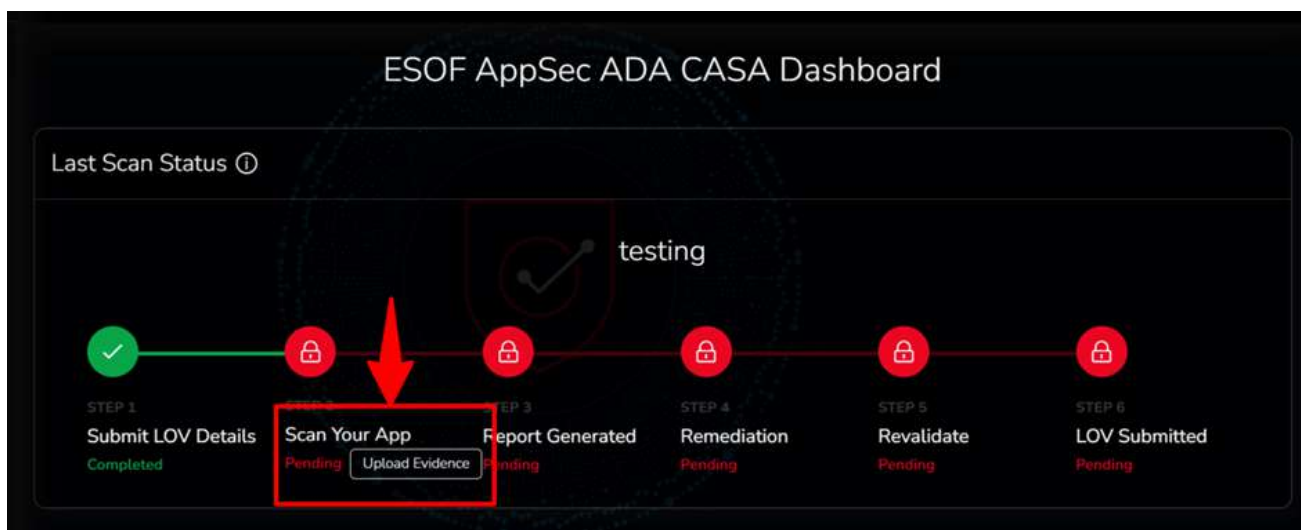

Outcome:

- The scan starts and its status can be monitored from the dashboard.

Step 7: Upload Required Evidence

Once the scan is completed:

- Open the **Evidence** section.
- Upload all required supporting evidence.
- Submit the evidence for review.

**Outcome:**

- The assigned tester reviews the submitted evidence.

If Evidence is Rejected

- Review the rejection comments.
- Update or correct the required documents.
- Re-upload the evidence.
- Submit it again for review.

Evidence Review

The uploaded evidence will be reviewed by the Tester and Manager.

- If the evidence is approved, your assessment will proceed to report generation.
- If any evidence is rejected, you must update the required information and upload the evidence again from the Uploaded Evidence section.

Step 8: Review Your Report

After successful evidence approval:

- A detailed Vulnerability Report will be generated.
- You can download the report from the Scans section of your dashboard.

Review all findings carefully before proceeding.

If everything is approved successfully, the final report will be available on the Scan List page.

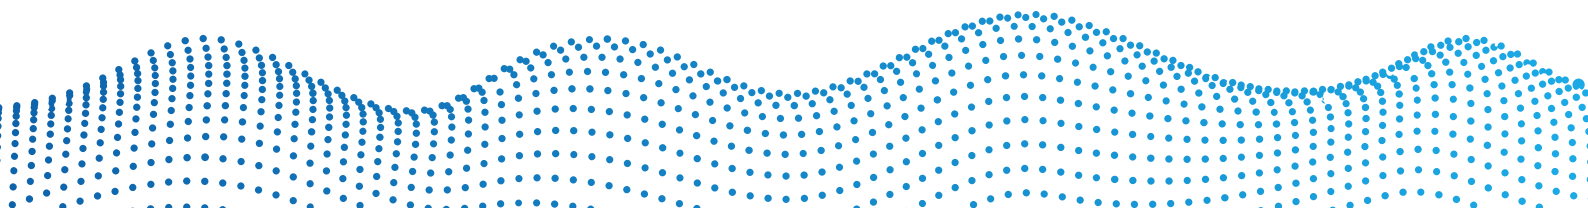

Step 9: Enterprise AL2 Assessment Process

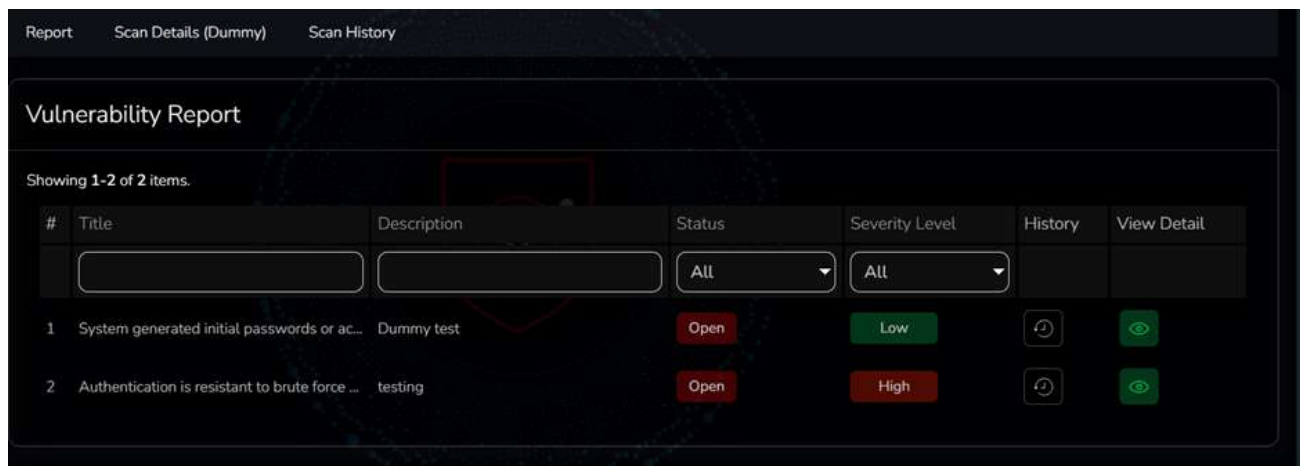

If you have selected the Enterprise AL2 plan, follow Steps 1 through 6 to schedule your scan.

Unlike the Basic, Premium, and AL1 plans, the assessment is performed by the TAC Security testing team.

AL2 Assessment Process

1. Schedule your scan.
2. The assigned Tester performs the security assessment.
3. The Tester validates the application and uploads the assessment results.
4. A detailed Vulnerability Report is generated.
5. Download the report from the Scans section.

Report Scan Details (Dummy) Scan History						
Vulnerability Report						
Showing 1-2 of 2 items.						
#	Title	Description	Status	Severity Level	History	View Detail
1	System generated initial passwords or ac...	Dummy test	Open	Low		
2	Authentication is resistant to brute force ...	testing	Open	High		

Review the findings and begin remediation.

Step 10: Patch Vulnerabilities & Perform Rescans

Patch Phase

- Fix all vulnerabilities identified in the report.
- Prioritize Critical and High severity findings.
- Apply the necessary code fixes, configuration updates, and security patches.

Rescan Phase

- Initiate a rescan from your dashboard.
- Verify that all vulnerabilities have been resolved.
- Continue remediation and rescanning until a clean report is achieved.

Step 11: Notify TAC Security

Once your application receives a clean scan report:

- Inform the TAC Security team by sending an email to:
casasupport@tacsecurity.com

Our team will review your submission.

Step 12: Google LOV Reverification

After the TAC Security review is completed:

- TAC Security submits the Letter of Validation (LOV) to Google.
- Google typically sends a LOV Reverification Email within 5–6 business days.
- Respond to any additional verification requests, if applicable.

Once Google completes the review and approves the submission, your CASA certification process is successfully completed.

CASA Certification Workflow

1. Visit the CASA Platform.
2. Select a subscription plan.
3. Complete the payment.
4. Create your CASA account.
5. Verify your account using OTP.
6. Complete the LOV details.
7. Schedule and run a security scan.
8. Upload the required evidence.
9. Evidence is reviewed by the Tester and Manager.
10. Download and review the Vulnerability Report.
11. Patch all identified vulnerabilities.
12. Perform rescans until the application receives a clean report.
13. (Enterprise AL2 Only) TAC Security performs the security assessment and generates the report.
14. Inform TAC Security after achieving a clean scan.
15. TAC Security reviews the submission and submits the LOV to Google.
16. Google sends the LOV reverification email within 5–6 business days.
17. Receive Google approval and complete the CASA certification.
